A career in design is more than a job. It is a way of seeing and interacting with the world. It involves more than a whole complex world of visual communications like talent, creative ability, manual skill, and technical knowledge.

Hi! I am Pragya (p. r .uh. g-y aa) and for me design, just as art has multiple definitions. Design is the method of putting form and content together. This togetherness can instigate positive change and is capable of achieving something genuinely meaningful.

SKILLS

Adobe Photoshop
Adobe Illustrator
Adobe Premiere Pro
Adobe Indesign
Autodesk Alias Automotive
Autodesk Maya
Key Shot
Hand Sketches
Marker Renderings
Painting Mix Media

Art Recognition Award 2012

Duke Of Edinburgh International
Youth Award 2009 and 2010

Onion Bag Football Tournament
Recognition Award 2010

OTHER THINGS

Along with my love for cars, I grew up playing football and going on hikes on the sand dunes of Oman. Indian origin and raised in the middle east I have the "third culture kid" syndrome, thus, to travel is to get in touch with myself. My interest in design began from my inner modernism artist!
